Why ICETAB 2014 ?

Why ICETAB 2014? The answer is, why not? Now is the best time to look at all disciplines form an integrated perspective. Meaning, let's look at engineering, technology and business management from an integrated perspective. The organizers of the conference bring the aforementioned disciplines together based on their respective strengths and experience. Universiti Teknologi Malaysia as a premier research university in Malaysia, will be represented by the Innovation and Commercialization Centre and the Publication Unit. These two units will be responsible in safeguarding the quality of papers submitted and subsequent publication in our journals will be realized accordingly. Batam State Polytechnic, as the host of the conference, plays a major role in sourcing and review submissions from Indonesia as well as to provide logistical support for the conference. The final partner is AFAP Network, which has expertise in conference management and marketing at the international stage. The combination of these three collaborators will ensure that the conference will be of high quality and standards as per expected by the participants.

Venue of ICETAB

ICETAB 2014 Venue
Politeknik Negeri Batam (Batam State Polytechnic). Parkway Street, Batam Center, Batam, Kepulauan Riau 29461, Indonesia

About Collaborators

POLITEKNIK NEGERI BATAM

Politeknik Negeri Batam or Polibatam (Batam State Polytechnic) is the only Vocational State University (PTN) in the free trade and free port area of Batam, Bintan and Karimun, Riau Islands Province. It is located at the Parkway Street, Batam Centre, Batam, Riau Island, Indonesia. As a vocational oriented

Politeknik Negeri Batam
(Batam State polytechnic)

college, it aims to strengthen the ability of practice and its students' skills, where the educational process is also supported by adequate infrastructure building. To face the industrial competition of free trade zone, Politeknik Negeri Batam is required to provide qualified human resources. Therefore, in order to balance between the industrial and science development, Politeknik Negeri Batam conducts research collaboration with industries. The research collaborations are expected to give benefit to Batam community in particular and to the country in general.

UTM INNOVATION AND COMMERCIALISATION CENTRE (UTM ICC)

UTM ICC acts as the main technology transfer unit and university's business arm that drives on the commercialization part of UTM's inventions. Developing substantially over the years, ICC offers a range of services from IP management to IP exploitation assistance to expedite on the commercialization process. A number of new spin-off companies have been formed to further exploit UTM's technology innovations via licensing, consultancies and various forms of joint venture agreements. The University's research activities range from life sciences, physical sciences, social sciences and humanities. ICC strives to strengthen the link between the industry, community and the university by organising a series of activities, forums and exhibitions to ensure continuous interactions between all parties. To know more on UTM's amazing discoveries and potential inventions, please contact ICC for access and links to the right UTM expertise and advice on the commercialisation process

AFAP NETWORK

Asian Federation of Academic Professionals is a loose coalition of academic, students and practitioners with a dedicated mission to organize affordable but quality conferences in Asian countries. We specialise in organizing conferences using the low-cost and no-frills approach with our partners, locally and internationally. AFAP focus on substance (the academic contents and publication opportunities from the conference) instead of forms (such as food, venue and other unimportant activities). In addition, any excess profits from the conference will be distributed to needy postgraduate students as part of our Corporate Social Responsibility (CSR). As an emerging player that provides training and conference management services for the Asian Federation of Academic Professionals, we have established ourselves as a regular training provider for departments such as Faculty of Management, UTM SPACE, Faculty of

Islamic Civilization and Malaysian Technology Development.

UTM PRESS

UTM Press assists in the university's academic publication and related policies. The Book Panel division is responsible for developing and upgrading the accumulation of manuscripts, acknowledging acceptance of topics, and approving payments of royalties and fees whilst the Jurnal Teknologi Panel is responsible for deciding the suitability of manuscripts in respect of their meeting the content and academic criteria, and to propose to the UTM Academic Publication Committee for approval. Publishing various university's research outcomes such as the academic journals and books, the unit also acts as the secretariat for the University Academic Publication Committee
